

CALL FOR PAPERS

WORKSHOP

“ALTERNATIVE APPROACHES TO THE BUILDING OF ECONOMIC DYNAMICS IN THE YEARS OF HIGH THEORY”

Collegio S. Chiara

Università di Siena

December 18-19, 2009

Organizers: Massimo Di Matteo and Franco Donzelli

The aim of the workshop is to assess the state of the art about the birth of economic dynamics in the interwar period. The debate around the topic is still open as many strands of thought have been competing in those “years of high theory” to gain full acceptance by economists.

Scholars interested in presenting a paper are invited to send an abstract to dimatteo@unisi.it and franco.donzelli@unimi.it before October 15th, 2009. Acceptance will be communicated by October, 31st, 2009.

The following have already guaranteed their participation: Michel De Vroey (Université Catholique de Louvain), Pierangelo Garegnani (Università di Roma 3), Marji Lines (Università di Udine), Alfredo Medio (Università di Udine), Luca Pensieroso (Université Catholique de Louvain), Alessandro Vercelli (Università di Siena), Massimo Di Matteo (Università di Siena), Franco Donzelli (Università di Milano).

Organizers are contacting editors of a few journals in the field to explore the possibility of having a special issue devoted to the workshop.
